Skilled Frontend Developer with a strong foundation in JavaScript, React and Next.js. Graduated from the Faculty of Commerce, specializing in Business Information Systems, and completed a MERN stack internship at the Information Technology Institute (ITI). Adept at creating responsive and high-quality web applications using agile methodologies like SCRUM. Committed to continuous learning and delivering user-centric solutions. Seeking a role that offers opportunities to enhance my skills and contribute to innovative projects.

Work Experience

- **Frontend Developer – Arab African International Bank (AAIB) (October 2022 – present)**
 - Experienced in working with agile methodology and Scrum framework, leading sprint planning, daily stand-ups, and retrospectives to ensure efficient project delivery and continuous improvement.
 - Collaborated closely with UX/UI teams to design and implement user-centric interfaces, optimizing user experience and driving customer satisfaction.
 - Led development on fintech solutions and bank website projects, implementing robust front-end functionalities and seamless integrations with back-end systems.
 - Utilized Git for version control and SonarQube for code quality analysis, ensuring codebase integrity and adherence to industry standards.
 - Leveraged Firebase for real-time data management and analysis.
- **Junior Software Developer – National Company for Software and IT (NTG) (March 2021 – March 2022)**
 - I was working on different projects related to E-Learning sector. Also, I worked on projects related to the organization identity and image.
 - Developing and maintaining web application solutions.
 - Developing Learning Management Systems and Content Management Systems
 - Converting Adobe XD designs into real world applications..

Professional Training and Internship

- **MEARN Development Intern – Arab African International Bank - Information Technology Institute (ITI/AAIB Academy Internship Track) (March 2022 – August 2022)**
 - I worked with technologies like React JS, React Native, Node JS, Express JS, MongoDB and a lot more. Also, I had the chance to work on a great graduation project, my main roles in this project were participating in these interesting tasks:
 - Building UI components and pages in React.js
 - Dealing with API Requests using Axios.
 - Using Redux (for State Management)
- **Web Developer Intern – Arawinz software Company (Jul,2019 – Sep,2019)**
 - I worked with technologies like HTML, CSS, JavaScript, JQuery and a lot more.
 - Developing and maintaining web application solutions.

Education

- **Bachelor of Business Information System– Faculty of Commerce, Helwan University (2016 – 2020)**
Overall Grade: Good.

Skills

1. Front-End Technologies:
